

# Libra+ Wirefree Chimes

# Libra+ Wirefree Chimes

Launched in 2006, Libra+ continues to be the consumer's choice for both style and functionality. The range, which features functions such as alert identification icons, volume control and Friedland's secure 868MHz frequency, now sees the additions of three new products to the range making it part of the larger Friedland chimes, security and home automation offering. See Page 8 for details of the new Libra+ products.

#### Features and Benefits:

- Wirefree portable, wall mounted and plug in options
- Operating range up to 200m\*
- Frequency of 868MHz FM which is a less crowded frequency, thus reducing interference
- Pre-programmed push-to-chime kits, for ease of installation
- Analogue (rotary) volume control
- Self-learning push to chime to avoid interference with neighbours' chimes
- Chime icons visually identify source of chime activation – a number of options are available including front door push and back door push
- CD quality sound
- 2 year guarantee
- White Plug-in 150m Chime kit now available
- White PIR Movement Detector and Chime kit now available
- Telephone Ringer for the hard of hearing and noisy environments now available

\* Max range between push and chime. Note: Building structures, e.g. metal and thick walls may effect transmission range.
