

## SMYLE KIT AND AURA KIT

Simplicity or elegance?  
A dilemma.

But why choose one or the other when you can have both? With the Smyle kit and the Aura kit, you take home an effective mix of fast, trouble-free installation and scrupulous design. With the possibility of switching smoothly from

doorphone systems to video doorphone systems. Without forgetting the great advantages of the Smyle kit, i.e. the possibility of setting up systems with only two wires, combined with the unmatched versatility of the reduced footprint entrance panel.

## SMYLE KIT AND AURA KIT

### Smyle kit, record-breaking dimensions and simplicity.

Whoever would have dreamt of making a kit even simpler? Urmet has designed the Smyle kits with an **extremely reduced-size** entrance panel to permit installation on a 100-mm wide plate or on a wall without the need for embedding boxes.

Smyle breaks all records as regards dimensions: a mere 185 x 99 x 35 mm. Despite its reduced size, Smyle guarantees **perfect led type lighting** of the entire surface of the name tag. Smyle continues to receive accolades for its extremely simple, fast installation. Without forgetting that the video doorphone version includes a manually-adjustable (from 0° to ± 5° horizontally and from -10° to +5° vertically) semi pin-hole TV camera.

The kits are completed by the extremely new Atlantico line.

### AURA kit, elegance and comfort combined.

The beauty and elegance of the Aura video door entrance panel are now available in kits.

With the possibility of choosing between the single-family and two-family version.

This kit, designed to meet the needs of Urmet's **most demanding, refined customers**, features extremely elegant styling and class-beating video doorphone system technology. With Domus Aura, the entrance panel with its "super mirror" steel front panel, frame and PVD treated brass buttons, unequaled ease of installation go hand in hand with unswerving elegance.

The Kit is complete with a standard Atlantico monitor in the single-family version and with two in the two-family version.

The AURA kit can be used to set up video doorphone systems with coax cable.

## INTEGRAL 2-WIRE DOORPHONE KIT WITH SMYLE ENTRANCE PANEL

The integral 2-wire Audio kit makes it possible to set up a single-family doorphone system. As only 2 wires are required, it is ideal to replace old systems with only bell type call.

- Characteristics:
- Max. distance 110 m
  - Call adjustment with mute
  - Mute function: the call mute function is activated with mechanical type visual readout
  - 1 extra button for secondary services (opening of vehicle entranceway, stair lights, etc.) with the possibility of adding a second button
  - Pre-engineered for door release with "main entrance" button
  - Possibility of connecting up to 4 doorphones in parallel (connection with 6 wires)
  - Dedicated doorphone Mod. 1133

- Ref. 1129/10** Integral 2-wire doorphone kit. The Kit includes:  
1 wall-mounted electronic doorphone 1129/110  
1 x 9000/230 12Vac transformer fitted on 2 DIN module bar  
1 entrance panel Mod. 1129/1 with 1 button, amplified integrated door speaker unit led type lighting.

## ACCESSORIES

## INTEGRAL 2-WIRE VIDEO DOORPHONE SYSTEM

With the color or b/w Smyle video kit, you can set up a single-family video doorphone system with only 2 wires.

It uses a standard Atlantico monitor 1702/1 equipped with a back-lit door release key and 2 service keys: the first is used for automatic activation without adding wires, while the second can be used for supplementary services (opening of a secondary electric lock, switching on of the stair lights, etc.). One of the following devices can also be connected in parallel with the monitor:

- An extra buzzer 9854/41
- An electronic doorphone 1133/1
- A standard Atlantico monitor 1702/1 b/w or color 1702/40 combined with bracket 1202/90 (a local power supply unit must be provided)
- PABX telephone exchange mod 1332

**Characteristics**

- 2 non-polarized conductors
- Max. distance 100 m
- Call volume adjustment with Mute. Activation of the mute function is indicated by a mechanical type visual readout with exclusion of the call
- Door opening timer 1-3-5 sec
- Personalization of the Atlantico monitor faceplate
- Silent auto-activation

Ref. 952/41

## 2-WIRE B/W VIDEO KIT

**Ref. 952/11** 2-wire video kit. The Kit includes:

- 1 standard Atlantico monitor 1702/1 c/w special bracket
- 1 dedicated door camera unit Mod. 1729/1 and door speaker unit 952/112
- 1 power supply unit on 7-module DIN bar
- 1 Allen wrench

## 2-WIRE COLOR VIDEO KIT

**Ref. 952/40** 2-wire video kit. The Kit includes:

- 1 standard Atlantico monitor 1702/40 c/w special bracket
- 1 dedicated door camera unit Mod. 1729/1 and door speaker unit 952/113
- 1 power supply unit on 7-module DIN bar
- 1 Allen wrench

Ref. 952/11

## SPARES FOR KIT MOD. 952
