

600 m 2-wire transmission set

Plug-in and you're ready to go. That's how easy it is to get video signal transmission over existing 2-wire lines. This transmitter and receiver set converts the video signal so that existing two-wire lines can be used to transmit signals with cable lengths up to 600 m. A CAT5 connection (with RJ45 sockets) or a screw terminal connection (adapter included) can be used to connect the two modules.

1 x BNC connector 1 Vss (75 Ohms)
1 x RJ-45 socket (100 Ohms)
Set consisting of transmitter and receiver
Includes screw terminal adapter
Dimensions (hwxwd): 23x19x66 mm
